International Bachelor’s and Master’s programmes 2022
Create your future with us

The University of St.Gallen is a place of thought leadership at the heart of Europe. We think, work and act in an integrative, committed and cooperative manner. Together we develop new ideas, gain new insights and thus create sustainable solutions – for the economy and the society of today and tomorrow.

Join the HSG community – we would like to welcome you!

From insight to impact

Dear Prospective Students

Your university years will be one of the most exciting and challenging times of your life. As President of the University of St. Gallen, I feel honored that you intend to spend this chapter of your life with us! What can you expect?

We are guided by our vision: “As a leading business university we set global standards for research and teaching by promoting integrative thought, responsible action and an entrepreneurial spirit of innovation in business and society.” Whatever programme you focus on, your studies will be interdisciplinary. By taking classes in social sciences and the humanities, you will not only broaden your horizon, but also sharpen your understanding of the complexity of today’s challenges.

As our student, you will have ample opportunity to take on responsibility and develop your own ideas. On the one hand, our innovative teaching formats provide you with practical experience. On the other hand, around 120 student associations and clubs are waiting for you to invest your energies in our dynamic campus community.

Our present is already digital – to handle our future, you will need corresponding skills. New technologies are part of our curriculum, but we also value personal encounters and in-class debates. This way we truly learn with and from each other.

I look forward to meeting you soon on our campus, and I wish you the very best for your studies!

Prof. Dr. Bernhard Ehrenzeller
President

Why St.Gallen?

13 Excellence in teaching and research

24 Living and studying in St.Gallen

26 Unique degree course architecture
“HSG is famed for its community, internationally connected in friendship. This network will carry you throughout your life.”
Why St.Gallen?
Study as an integrative learning experience

Integrative. Committed. Cooperative. As a student at the University of St.Gallen, you will experience these values come to life. Be it through our unique degree course architecture, the combination of high academic and strong practical relevance, or through your involvement in our projects and associations. Thus “From insight to impact” is our promise, which contributes to the social and economic development as well as to your personal growth.

We view studying as a holistic learning experience. We teach knowledge and skills that make the difference in the economy, society, and politics of the 21st century.

Contextual studies – part of the “HSG DNA” and a distinguishing feature of our university – allow our students to make valuable cross-curricular connections and develop social, ethical, historical, and intercultural awareness in addition to acquiring subject knowledge. This combination will help them make the right decisions in terms of their professional career and far beyond. For those who are aware of their own social responsibility think more integrative, act more sustainably.

St.Gallen connects

As a student of the University of St.Gallen, you have the opportunity to spend an exchange semester at one of our roughly 200 partner universities worldwide.

The HSG is known for its friendly community. This network carries you throughout your life. It is established during your studies, e.g., in group work, practical projects or voluntary commitment in one of our 120 student associations and initiatives or in joint leisure activities.

Science and practical application in dialogue

This maxim guides us as a public educational institution that is fully aware of its social responsibility and creative leadership.

Our 107 professors, nine associates and 78 assistant professors, 32 permanent lecturers and 591 lecturers dedicate themselves to the education of our students. They do this with great success.

Our holistic education at the highest academic level has been awarded the accreditation labels EQUIS, AACSB and AMBA.

In addition to their teaching activities, many of our academic teachers work in one of the 46 institutes, independent research centres and centres of the University of St.Gallen. There they research today’s and tomorrow’s pressing scientific topics such as the future of healthcare, sustainable investment strategies, renewable energies and climate change.

All the while our academics maintain contacts with organisations in business, law and politics. With these activities rooted in science and practice, we ensure that our lecturers not only keep their finger on the pulse of the times but can also pass on this knowledge and experience to their students in lectures and seminars.

At the University of St.Gallen, six schools conduct both basic and applied research: School of Management, School of Finance, School of Economics and Political Sciences, Law School, and the School of Humanities and Social Sciences.

In 2020, the School of Computer Sciences was established. Its nine professors are currently researching and teaching in the fields of Artificial Intelligence and Machine Learning, Cybersecurity, Data Science, Foundation of Computation, Human-Computer Interaction, Interaction- and Communication-based Systems, and the Programming and Development of Software Systems.

Tackling social core topics head-on, these schools ensure our mission in teaching and research.

Cooperative and Committed – Vibrant #Studentlife

On campus

Situated on the Rosenberg with a grand view over the city, our campus offers ideal study conditions. The distances between the individual areas are short, and the modern infrastructure supports our students ideally in their learning. The HSG campus is more than just a place of education – it is a place of encounter, inspiration, and art. Here, works of art by Penalba, Richter, Miró or Giacometti meet the buildings of the architects Walter M. Förderer and Bruno Gerosa.

More Campus 2022

We are building the future of learning and teaching. The aim is for the Learning Center to be a future oriented place to think and work, paving the way for new forms of learning and interaction between students, lecturers and people with practical backgrounds. Here, a holistically conceived infrastructure for learning, teaching and exchange is being created, geared entirely to the requirements of tomorrow’s society.

In 2025, ground will also be broken for work on our second location. On six floors and a total of 31,000 square metres, our new building in the middle of the city will create new space.

In the city

St.Gallen has a lot to offer its approximately 80,000 inhabitants: a historically valuable Old Town, numerous shops, street cafés and restaurants, bars and clubs. The monastery quarter with the baroque cathedral and the abbey library was named UNESCO World Heritage Site.

Situated between the Alps and Lake Constance, St.Gallen also provides ideal conditions for a wide range of leisure and sports activities in the surrounding area. The natural swimming pools “Drei Weieren” are within walking distance of the city centre.

Connect. Collaborate. Create.

In the heart of the city, our students run the innovative coworking space “TheCo”. From 7 a.m. to 10 p.m. and seven days a week, workplaces for individuals and groups, design thinking spaces and retreats are available in an interactive and communicative atmosphere.

Art and culture

An impressive cultural programme awaits you with one of Switzerland’s biggest Open Airs, the performances of the City Theatre and the Tonhalle, the St.Galler Festspiele – a classical music event held every summer – and numerous exhibitions in museums and private galleries. The St.Gallen Art Museum and the Kunsthalle Sankt Gallen connect the city with the international art scene.

Our own grounds are home to important works of art waiting to be discovered. The Pro Arte association offers guided art tours. Dive into the space between science, art, and architecture. Immerse yourself in the fascinating art of the modern age.

Our sports offer

To keep body and mind in balance, Unisport provides you with a wide range of sports and training opportunities at our own and external sports facilities. On campus, for example, you will find a modern sports hall with a gym, group fitness courses as well as an artificial turf pitch and a beach volleyball court.

Around 150 training instructors professionally supervise you and support you in shaking off the stress of university life. Our programme includes more than 150 training sessions in more than 50 sports every week. Most of our courses and services are available to you free of charge. With us, even professional sports careers integrate seamlessly with your studies.

sport.unisg.ch

Well catered for

Our cafeteria offers a wide selection of delicious menus over lunch, as well as a cold and a warm buffet to meet almost all dietary needs. Meet your friends in one of the popular cafeterias for a chat, a snack or to learn. Students run the campus bar “[ad]hoc” and the “MeetingPoint” downtown at the Blumenbergplatz. Here you can enjoy a strong coffee or just hang out with other students on your nights off.
TheCo, run by our students, is a success story and only one example for the big commitment of our students. Learning and working in that environment is a real pleasure. We are proud of you guys!
Virtual Campus Tour with Andreas Oberholzer
unisg.link/campustour
Would you like to learn more about the campus and student life at our University? Then you can get an idea from our virtual campus tour: have a look at the Audimax, the Library and the student-run cafés and bars. Learn more about what makes our HSG* so unique.

*HSG is the nickname of the University of St.Gallen. It derives from the University’s previous name, Handelshochschule St.Gallen (Graduate School of Economics and Business Administration).
“The student life and the high level of student engagement on and off campus is unique and provides students from any background with the opportunity of experiencing the incredible community.”
The Student Union of the University of St.Gallen (SHSG) is the official student representative body at the HSG and the umbrella organisation of all the student associations and initiatives. Its representatives and the students work towards the realization of their ideas and contribute to the development of the university. In order to do that, many students use their spare time to actively get involved on campus in the approximately 120 accredited clubs and initiatives which contribute to life on and off campus every day. This engagement is actively supported by the university’s active encouragement of its students to assume responsibility and have an impact. Thanks to this support, the range of clubs is very vast and diverse, but still allows for further input and the founding of even more clubs. The student life and the high level of engagement on and off campus in student associations is unique and provides students from any background with the opportunity of experiencing the incredible sense of community connecting HSG students with each other and with the University. Possible activities range from writing for the students’ magazine prisma, organizing Europe’s biggest student-run startup event with START, being part of the committee organizing the renowned St.Gallen Symposium but also sport associations – ranging from Lacrosse to Sailing, Football to Tennis.

Of course, art and culture also play an important role. ProArte for example is an association which brings the artwork presented at different locations of the University closer to the students and to guests. The HSG Big Band, the HSG orchestra and the HSG choir allow for a wide variety in musical styles which also brings students together.

The clubs/associations/forums Model WTO or St.Gallen Model United Nations enable those who are interested in politics or debates in general to discuss challenges that societies are facing worldwide. Foraus, a club focusing on Swiss foreign policy, or Sicherheitspolitisches Forum, a forum on public safety policies, regularly organize podium discussions.

To find employers of the future, the HSG TALENTS Conference, or more industry-specific conferences like the Banking Days and Consulting Days give HSG students the opportunity to build and foster their network, find internships and mingle with like-minded people. Working as a community in order to have an impact, both on and off the campus – this is what connects students from day one and ignites the “HSG-Spirit”.

Additionally, the focus on sustainability is well anchored in the clubs at HSG. With the HSG Charter 2030, student associations are proactively working on long-term beneficial project whilst also finding synergies to move towards a more environmentally and socially friendly future. This is actively supported by SHSG, as sustainability is one of the key pillars for student engagement on campus. shsg.ch
Make an impact: Students organise the phantastic Pride Month.
Enabling all students to develop their potential

Unigay, one of approx. 120 associations at the HSG, creates a community for LGBT+ people on the University campus. Its own mentoring programme encourages networking and an exchange of experience about identity and career issues between students and professionals.

unigay.ch

Examples for even more student clubs:
The University of St.Gallen promotes entrepreneurship
The University of St.Gallen promotes entrepreneurship

Start-ups provide innovative solutions for society and strengthen the economy. The HSG actively supports entrepreneurship with numerous consultations and events. At the Start Summit student initiative, for instance, 1,500 young entrepreneurs meet up with investors, experts and students.

startuphsg.com
Living and studying in St.Gallen

The visa process

Most students who come to Switzerland must obtain a visa prior to entering the country. It may take several months for a visa to be issued. Please contact the Swiss Embassy in your home country at an early stage to find out about the relevant procedures and documents to be submitted. In most cases students must prove that they have sufficient financial means to fund their stay in Switzerland. Therefore, they will have to transfer money (currently CHF 24,000) into a Swiss bank account and submit the bank statement with the other documents to the embassy to obtain the visa. Please note that you will need this amount during the first year, and make sure that you can finance the following years as well.

edas.admin.ch

Entry and residence

The Admission and Crediting Office assists international students with information regarding entry into Switzerland and residence:

admissions.unisg.ch

Health insurance

Various items of information about moving to St.Gallen and about health insurance schemes for international students can be found on the website of the city of St.Gallen. Students are required to take out Swiss health insurance unless the Swiss authorities accept their original one. Costs start at around CHF 100 per month.

stadt.sg.ch

Tuition fees and scholarships

Tuition fees

Tuition fees are rather low in Switzerland because the Swiss Confederation and the cantons subsidise university education.

Scholarships and funds

Loan and scholarship fund

To ensure financially disadvantaged students are also able to study at the University of St.Gallen, we have the loan and scholarship fund. The fund offers scholarships and loans to students enrolled in the Bachelor’s or Master’s programmes, respectively. Additionally, all international students can be granted a scholarship that covers the difference between the tuition fees for Swiss and foreign nationals. The purpose is to support students in financial need. Applications from first-semester students are reviewed and assessed in more detail.

Further information about the funding of your studies and about the scholarship database can be found on our website. studyfunding.unisg.ch

The University of St.Gallen offers various Excellence Scholarships in the amount of the tuition fees for international undergraduates and graduates. Following an internal selection round based on academic performance at the University of St.Gallen, students are invited to submit additional documentation as a grant application, based on which a final selection is made.

Further information about Excellence Scholarships can be found on the studyfunding website. excellence-scholarship.unisg.ch
Expenses and income

Cost of living

To be able to fund your studies, you should have about CHF 2200–2600 a month at your disposal. The budget table provides you with an example.

Accommodation

We do not offer on-campus housing. In St.Gallen it is easy to find an apartment or a room in a shared flat. Rents range from CHF 500/650 upwards per month. Rents for small private studios range from CHF 650 upwards per month. The HSG’s Student Mobility offers a limited number of rooms in a student residence against a brokerage fee. Interested students should contact us as early as possible (exchange@unisg.ch). The Student Union provides more information on the housing market on its website. shsg.ch

Working and studying

About 75% of students at the Bachelor’s and Master’s levels work part time during their studies, as a rule between 10% and 50% of full-time hours. During the Assessment Year, the first year of undergraduate studies, only very few students work since the course workload is very time-consuming. In addition to the jobs in the private sector, there are jobs available to students in the University administration and at the HSG institutes. Further information and a platform with job offers are provided by the Career & Corporate Services (CSC). my.hsgcareer.ch

Travelling

In Switzerland, travelling by public transport is very convenient and is encouraged. Students are advised to obtain the Swiss Federal Railway half-fare card in order to save 50% on all tickets. It is available for CHF 185 and valid for one year. sbb.ch

In St.Gallen it is easy to find an apartment or a room in a shared flat. Rents range from CHF 500/650 upwards per month. Offers are available on Facebook on “Sharing is Caring University of St.Gallen (HSG)”.

shsg.ch
The University of St.Gallen offers a unique degree course architecture that promotes the personal development of our students in addition to excellent academic and professional training. In a holistic approach, intellectual abilities, flexibility, a sense of responsibility as well as intercultural and foreign language skills are promoted as optimal preparation for the modern working world.

Core Studies

The core studies at the University of St.Gallen teach the basics of the chosen study programme in the compulsory subjects and are complemented by a wide range of programme-specific compulsory electives. The core studies also offer our students the opportunity to take further electives from the other study programmes and thus to place an additional focus on topics that correspond to their own interests. Thus, our students can develop very individual profiles that support them in realising their professional and personal goals.

Contextual Studies

A special feature of our study architecture is that all students take courses in contextual studies in addition to their core studies courses. In the contextual studies, the specialised economic, legal and computer science studies are supplemented and reflected upon from various perspectives in the humanities and social sciences. Our students learn that economic decisions are always embedded in social, cultural and historical conditions and must therefore be considered holistically. They are thus educated to become personalities who are aware of their social responsibility and who will be able to act flexibly, responsibly and sustainably.

As part of the contextual studies, students complete both hands-on courses to acquire skills and languages as well as courses to strengthen their reflective competence in different focus areas. After an introduction to the disciplines of history, philosophy, psychology and sociology in the Assessment Year, the contextual studies courses taken during further undergraduate studies enable students to study certain areas with a multidisciplinary approach in more depth: media, cultures, history, society, responsibility, creativity, law and technologies. Here we put our focus on themes that are at once highly topical and persistently relevant. Courses in Skills and Languages, for example, include rhetoric, programming and a great number of languages.

Contextual studies offer a “Workshop” for every area of concentration. In this blended learning format, students work independently on an interdisciplinary assignment that combines the content of a course from the core studies with topics from the contextual studies. The prerequisite for this is that at least one course in the contextual studies has already been completed in a previous semester alongside the core studies.
The “Workshop”:

– links core studies and contextual studies in an innovative way,
– is an ideal preparation for the Bachelor’s thesis,
– is weighted with 6 ECTS, which are credited to the area of concentration.

With the workshop in these eight focus areas, students are offered the opportunity to acquire in-depth qualifications, which are also shown in the Diploma Supplement.

Computer Science

The structure of the Computer Science degree is different from that of the Economics or Law degree in many aspects. For further details, please refer to the relevant programme site.

mcs.unisg.ch
Bachelor's Level

Assessment Year

The Bachelor's Level at the University of St.Gallen consists of the two-semester Assessment Year and the Bachelor's Studies, which has a standard period of study of four additional semesters. The Assessment Year provides our students with subject-specific and scientific fundamentals and trains them in the techniques of scientific work. They also begin to engage with issues raised in academic and social discussions across disciplines.

The Assessment Year can be taken in Economics, Law and Computer Science. The Assessment Year in Economics can be completed entirely in German or English. In order to continue with the Bachelor's Studies, both the Assessment Year in its entirety and the accounting examination of the University of St.Gallen must be passed.

Graduates of the Assessment Year in Economics can enter directly into the Major in Business Administration, Economics, International Affairs, Law and Law and Economics. The Assessment Year in Law enables direct entry into the Major in Law. However, it is also possible to change to any major by catching up on individual achievements.

Bachelor's Studies

The Majors in Business Administration, Economics and International Affairs are studied in a flexible mix of German and English, with a minimum number of credits to be completed in the other language. The majors in Law and Law with Economics as well as the major in Computer Science are offered in German.

In addition to completing the core and contextual studies as well as the compulsory foreign language, a Bachelor's thesis must be written. After acquiring all the necessary achievements, our students are awarded the academic degree Bachelor of Arts, or Bachelor of Science for the Major in Computer Science. This academically qualifying degree enables students to enter professional life or to take up a Master's programme.

Master's Level

The University of St.Gallen offers 14 Master's programmes that build on the respective major of the Bachelor's degree. The 13 programmes in economics and law have a standard period of study of three semesters, the Master's programme in Computer Science has a standard period of study of four semesters. Depending on the programme, students can study either in German, English or in both languages.

Our graduates receive a clear academic profile that prepares them for demanding tasks in practice and science. After acquiring all the necessary achievements in the core and contextual studies and successfully writing a Master's thesis, our students are awarded the academic degree of Master of Arts, or Master of Science for the Computer Science programme.
Our Team of the Teaching Innovation Lab continues to develop new forms of learning.

The HSG Learning Center creates an ecosystem for the further development of the learning and teaching culture at the University of St. Gallen. The opening is planned for spring 2022.
New teaching and learning formats

At HSG, numerous modes of delivering knowledge to students are implemented strategically for the benefit of the students’ learning process. In addition to traditional face-to-face lectures, exercises and seminars, students can also learn online, independent of time and place.

Classroom Study and Independent Study

This allows the students to acquire an understanding of basic theoretical concepts at their own pace and to assess them in-depth on an individual level. The learning progress can be monitored during the semester through reflection tasks or with a quiz duel on the learning app Brian. Digital learning content is designed so as to perfectly correspond with the course’s face-to-face sessions. This blended learning approach allows asynchronous learning of the course material that is discussed, critically analysed and further consolidated in interactive face-to-face sessions.

HSG promotes the learning and development of our students not only through formal curriculum but also through the informal and extracurricular aspects our campus environment provides. The HSG Learning Center offers students, faculty and alumni an inspiring environment in which ideas can be discussed and experimented with. Whether it is hybrid teaching, a pop-up conference, developing and testing a start-up idea, or relaxed moments of contemplation on the grassy sundeck — the new centre’s innovative technology and thoughtful design invite a free exchange of ideas, encourage socialisation and promote creative collaboration.

Master’s level

Additional Qualifications
StartWeek

New students in the Assessment Year of undergraduate studies must attend StartWeek. It takes place a week before the beginning of the semester, in calendar week 37. In this week, new students become acquainted with the University and with academic life, solve a case study together and make new friends. startwoche.unisg.ch

Objectives

The Assessment Year is the first year of undergraduate studies. In the course of this clearly structured year, you will acquire a wide range of basic knowledge. The broadly-oriented subject matter of the Assessment Year will make it easier for you to choose a major after your first year.

Structure

Core Studies

In the Assessment Year, core studies consist of the three compulsory subjects Business Administration, Economics and Law, as well as of Mathematics or Law II as core electives. Core studies allow for the acquisition of basic knowledge. In Business Administration, you will deal with the systemic fundamentals of management theory with the help of the St.Gallen Management Model, viewing the topic from an integrative and ethical perspective. You will acquire basic insights into the marketing management of an enterprise, as well as into financial management and accounting. In Economics, you will acquire a fundamental knowledge of micro- and macroeconomics, while in Law, you will become familiar with Swiss private and constitutional law, and international law in the English-language Assessment Year.

Contextual Studies

Besides core studies, you will also attend courses in contextual studies, which consist of Skills, Cultural and Social Sciences and Foreign Languages. The introductory courses in Skills, “Introduction to Academic Writing” and the “Integrative Project”, serve to convey and apply fundamental working techniques and the acquisition of interdisciplinary knowledge. In Cultural and Social Sciences, there is a choice of seminars in history, philosophy, psychology and sociology. Furthermore, we offer courses of varying degrees of difficulty in ten foreign languages.

Examinations and standards

Examinations are spread throughout the entire Assessment Year. There are different examination formats, such as written and oral examinations, seminar papers and the academic term paper.

Admission criteria

– Recognised school leaving certificate, e.g. IB, A-level or Swiss Matura
– International students: HSG entrance examination.

Please consult our website for detailed information: admissions.unisg.ch

Programme start: Autumn Semester, StartWeek CW 37
Application time frame: 1 October – 30 April
Bilingual Bachelor’s studies

At the University of St. Gallen, undergraduate studies consist of the Assessment Year and studies in the major. After three years, students are awarded the degree of Bachelor of Arts HSG.

You will be able to complete the Assessment Year either in German or in English. Students who intend to choose the German-taught majors in Law, or in Law and Economics, have to complete the Assessment Year in German. Those who plan to major in Business Administration, Economics or International Affairs can choose either the German or English track of the Assessment Year as these majors are bilingual.

All students doing a bilingual Bachelor’s programme have to earn at least nine or twelve credits, respectively, taught in the other language. Students who choose the English-language track of the Assessment Year are not required to speak German prior to their studies. They can learn German while they are studying and can attend the courses taught in German at the end of the Bachelor’s programme. German classes are offered by the HSG’s Language Center.

unisg.link/StartWeek
Bachelor of Arts HSG in Business Administration

Is Business Administration the right thing for me?

Are you interested in how the management of economic organisations works? Would you like to learn how the various departments of a firm operate and interact? In our Business Administration major, you will also deal with the complex interconnections of entrepreneurial action in a technological, social, political, ecological and ethical environment.

Content

The major in Business Administration will provide you with an internationally recognised, practice-oriented basic education. The compulsory programme covers all the essential aspects of business administration and also provides a fundamental introduction to Computer Science for business studies.

In addition, we provide you with an integrative view of economic activity. Thus, entrepreneurial action is placed in a wider context in the compulsory courses in economics, whereas courses in law demonstrate the legal framework conditions.

Compulsory courses

- Marketing
- Strategic Management
- Leadership & Human Resource Management
- Introduction to Operations Management
- Fundamentals and Methods of Computer Science for Business Studies
- Methods: Empirical Social Research
- Methods: Statistics
- Corporate Finance
- Accounting, Controlling, Auditing
- Microeconomics II
- Macroeconomics II
- Business and Tax Law
- Capstone Project

You have the opportunity to specialise in one of nine profile areas. The voluntary specialisation will be listed in the supplement of your Bachelor diploma.

You will be able to extend your business administration knowledge with the help of core electives; with regard to electives, you will also be able to attend courses from other majors.

In contextual studies, you can choose from a wide range of courses in the humanities and social sciences. In the last year of the major in Business Administration, you will write a Bachelor’s thesis and complete a Capstone project. Both parts will round off your education and constitute the conclusion of your degree course.

Programme language

Business Administration can be studied in a flexible mixture of English and German. Now all the compulsory subjects (with the exception of Microeconomics and Macroeconomics) will be offered in one of the two languages every semester. All students have to earn at least 12 credits taught in the other language.
Bachelor in Business Administration – and then?

A degree in Business Administration will qualify you for jobs in various corporate divisions and for various Master’s programmes.

Is Economics the right thing for me?

Do you find it exciting to see how economic crises develop and what policies are the right responses to them? For example, does digitalisation and globalisation necessarily induce social inequality? Which people are most affected by a high unemployment rate? How should the banking system be regulated after a financial crisis? Why is Apple so successful? What happens if a central bank increases the money supply?

If you are interested in such questions, you should probably study Economics.

Economics in the modern world

The major in Economics pursues the goal of providing you with insights into the economic behaviour model, into the modus operandi of markets and governments, as well as with an understanding of interrelations among institutions and economic policies. You can acquire skills in data analytics and data handling, an important skillset in the modern world. The core courses offered by the Major in Economics are complemented with a broad range of core electives, with which you will be able to find your own focus within the major and steer your own path through your studies. Below you can find an overview of the core courses required within the Economics degree:

Compulsory courses in Economics

The following courses are part of the core requirements of the Economics degree:

- Microeconomics II
- Macroeconomics II
- Microeconomics III
- Macroeconomics III
- Data Analytics I: Statistics
- Data Analytics II: Empirical Economic Research
- Data Handling: Import, Cleaning and Visualisation
- Accounting, Controlling, Auditing

Elective courses in Economics

The elective course offerings are extensive and range from business administration, law to traditional economics and finance courses. There are specialised courses such as digital literacy, machine learning and programming. The electives are designed to complement core studies, which allows you to find your own focus and specialisation within your degree.

Contextual Studies in Economics

Taking contextual studies courses is a requirement of every degree programme at the University of St. Gallen. The wide range of courses in the humanities and social sciences offered, is designed to provide students with a well-rounded education that further develops ones sense of self and how one faces real world challenges and solutions.

The Bachelor’s thesis will enable you to create a basis for a Master’s programme or a possible later academic career.

The major in Economics also prepares you very well for the start into your professional career.

Programme language

Economics can be studied in a flexible mixture of English and German. All students have to earn at least 9 credits taught in the other language.
Bachelor in Economics – and then?

The Economics degree from HSG is a recognised and highly valued qualification. Our graduates work in the economic departments of banks and insurance companies, in federal offices or, for example, international organisations. We like to keep in touch with our graduates, thus providing a strong network of Alumni who are engaged with current students.
Is International Affairs the right thing for me?

When you browse through the newspaper in the morning, do you go straight to the stock exchange pages or don’t you get any further than the international news? Are you interested in problems within the EU which are a consequence of different political systems? Do you want to know how aid is provided for disaster areas or how diplomats act when conflicts arise between countries? In the major in International Affairs, you will deal with central social challenges situated at the crossroads of politics, the economy and international law.

Content

With courses in economics, political science and selected areas of law and business administration, the major in International Affairs (BIA) pursues a generalist approach which pools and integrates these disciplines. We help you improve your ability to make sense of what is going on in the world, and to make sound judgements. Moreover, we provide you with analytical skills and methodological proficiency.

Compulsory courses

– Political Theory
– Public Management
– International Relations
– Comparative Politics
– European Governance
– International Law
– International Economics
– Microeconomics II
– Macroeconomics II
– Quantitative Methods
– Qualitative Methods
– Accounting, Controlling, Auditing

Core electives, i.e.

– Comparative Political Economy
– Development Economics
– Current Issues and Problems in International Politics
– European Law
– International Management
– Global Health Governance
– Digital Government
– National Model United Nations
– Model WTO

Alongside to the compulsory subjects (48 ECTS) the BIA offers core electives with courses on specific global challenges (24 ECTS), independent electives where students can choose from the course offer of all HSG Majors (12 ECTS) as well as contextual studies with courses in the humanities and social sciences (24 ECTS). The Bachelor’s thesis constitutes an integrative part of the programme. It provides you with an opportunity to integrate and apply the knowledge you have acquired.

Programme language

International Affairs can be studied in a flexible mixture of English and German. All students have to earn at least 9 credits taught in the other language.
Bachelor in International Affairs – and then?

The BIA paves the way for many professional opportunities in companies, international organisations, politics, public administration, the media and non-profit organisations.
The programme focuses on our proven Three-Track concept modelled after the marketing functions of the future (customer focus, emerging management issues & marketing functions). With an extensive and academically well-founded education in the fields of consumer behaviour, market research and marketing management, students learn how to run a company in a customer-oriented manner, and how to satisfy customer requirements, to ensure that companies are able to stand their ground to succeed in global competition.

Objectives

MiMM graduates:

– identify challenges and the need for action from the viewpoint of customers and the market and are able to adopt other entrepreneurial perspectives.
– are familiar with all current methods of market research and are able to apply them in a market setting.
– conduct well-founded assessments of the effectiveness and efficiency of strategies and campaigns in the context of market-oriented corporate management (marketing management).
– have honed their lateral thinking skills and are able to conceptualize innovative solutions applicable in dynamic market environments.
– are well versed in the responsible usage of digital media.
– combine qualitative and quantitative analytical and conceptual methods in order to solve present and future problems.
– gauge the impact of entrepreneurial strategies on the market, on society and on the environment in a realistic manner.
– have learnt to overcome even unexpected challenges in a spirit of personal responsibility.
– act entrepreneurially at individual, project-related and organisational level and formulate clear strategic recommendations.

Student Profile

Students are characterised by a great interest in practical problems and academic questions. In this way, they are able firstly, to understand the mechanisms and processes driving today’s markets, and secondly, to successfully implement solutions. They are curious, entrepreneurial, communicative and enthusiastic.

Career opportunities

Soundly acquired knowledge and new combinable skills (analytical and conceptual skills, instrumental knowledge) and the practised basic approach (market orientation and responsible action in practice) are an indispensable necessity for success in the world of work in an ever accelerating, complex market.

We strive to provide the skills necessary for the future professional profiles in marketing. This means doing justice to:

### Credits
- 3. Semester: 30 Credits
- 2. Semester: 12–24 Credits
- 1. Semester: 0–12 Credits
- Total: 18 Credits
– The increasing significance of digital competencies
– Analytical competencies, such as advanced analytics
– “Contentual” competencies, such as storytelling
– The ability to think and work in a solution-oriented manner
– Involvement in transformation processes (in cooperation with other departments, introducing the customers’ viewpoint)
– Marketing-strategy support.
  Developing concepts and positioning for (business model-) innovations.
– Managerial assessment of innovative marketing approaches and evaluation of their contribution towards corporate success
– Preparation for a possible subsequent doctorate

Content and structure

The MiMM programme is based on a three-track concept (customer/corporate management/functional). The three compulsory courses in the fields of customers (Consumer Behaviour & Methods), corporate management (Marketing Management) and function (Marketing Functions) are preceded by a course of fundamentals (Introduction to Marketing Management) with an integrative study trip. Within the scope of the Applied Research Projects 1–3 (compulsory courses) students carry out a three-semester long practice project in close cooperation with businesses and supervised by a member of teaching staff. Additionally, several core electives offer a selection of continuously renewed courses that supplement the three tracks and are dedicated to responsible and sustainable behaviour in research and practice. These diverse commitments lead to the MiMM being listed as one of the HSG’s sustainability programmes.

Studying internationally

The University of St.Gallen enables students to spend exchange semesters at one of our 200 partner universities. In addition, you can apply for the CEMS MIM or a DM2 double degree programme.

exchange.unisg.ch

MiMM admission criteria

– A university degree that is recognised as equivalent, in the same or a similar major than business administration, with at least 180 credits.
– International students are admitted on the strength of the documents they submit.
– Supplementary work (Integration Week or Master’s preparatory courses) is compulsory.

The admission criteria may be subject to change. Please consult our website for the latest detailed admission criteria:
admissions.unisg.ch

Programme language

The MiMM can be studied in German and in English.

Proximity to corporate practices is what makes our programme stand out: topical and relevant issues with case-related approaches to solutions play as important a role as do reputable guest lecturers and close cooperation with selected companies. We want to foster your entrepreneurial mindset and support you on your journey to becoming a critically-thinking individual able of taking action. The MACFin programme creates optimal conditions for a successful start to your career.

Objectives

The MACFin prepares you for professional responsibilities in the field of financial corporate management. No matter whether you look at it from the perspective of a management consultant, a start-up founder, a controller, an auditor or a banker:

– you analyse an organisation’s sustainable financial and earning power, assess the profitability of clients’ distribution channels and brands, and issue recommendations for their further strengthening;
– you utilise new technologies and the resulting digital transformation opportunities within the context of financial management in order to achieve business growth;
– you deal with the requirements imposed by the capital market and the regulators;
– you design Mergers & Acquisitions processes for strategic growth initiatives and assess their impact;
– you conduct management performance assessments and create incentive-compatible management instruments.

Student profile

Your goal is to steer a company’s future development with sustainable success? Do you want to be able to use key figures to underpin its strategic growth opportunities and thus make your arguments more powerful? Then you fit our target group excellently. As a MACFin student, you have a great interest in issues of financial management from a CFO’s point of view. Your academic and practical curiosity puts you in a position to not only become acquainted with concepts in a theoretical manner but to scrutinise them, assess them independently and adapt them to fit the context. Simultaneously with your education in this field, you will further develop your analytical and communicative skills. In this way, you will be prepared to assume responsibility in leading positions in a complex and volatile environment in the future.

Career opportunities

We would like to provide you with the wherewithal for an exciting and unique career. As a MACFin graduate, you will not only have the necessary theoretical foundation but also be conversant with practice-oriented project work, positioning and opinion-leadership, as well as being involved in the production of solutions and decisions. And this is also why MACFin graduates find themselves in positions of responsibility in big and smaller corporations, on all continents, with responsibility for line functions, project work, management consultancy, or auditing. Some of them decided to take the leap and found their own start-up business.

Content and structure

The content of the Master’s programme focuses on the current and future tasks of financial management, which are undergoing radical change. What does digital transformation entail for corporate management? How can the countless pieces of information that are available today be analysed and put to good use (big data analytics)? How do new technologies such as blockchains impact on existing business models? These questions and others call for a new and integrated understanding of financial management.

The newly reformed compulsory part of our programme focuses on three central topic areas (Corporate Finance/Management Accounting/Reporting and Auditing), which are taught both in German and English. In the core elective part of our programme we offer a cross section of courses in financial management and its various disciplines. This will allow you to concentrate on your interests and make a selection from among a great number of courses. In basic core electives (12–27 ECTS), the spectrum of financial management will be covered by a selection of at least four courses, whereas in immersive core electives (12–24 ECTS), at least two extensive courses provide you with specialist knowledge and prepare you for the start of your professional career. In this way, everyone will be able to pursue their individual requirements and interests. Nearly half of the courses are offered in English. So that you can complete MACFin in German only, in English only, or in a combination of both. Apart from that, you can enhance your MACFin degree with additional qualifications “Business Education” and “Digital Communication and Journalism” also offered by the University of St.Gallen.

Studying internationally

We support you in the international orientation of your studies. For example, you can apply for the CEMS MIM or DM2 double degree programmes. In addition, you will be able to spend an exchange semester at one of our approx. 200 partner universities. Alternatively, you can spend a semester at a non-partner university of your choice as a Free Mover. Most of our graduates spend at least one semester abroad during their studies.

Master of Arts HSG in Strategy and International Management (SIM)

The mission of the Master’s programme in Strategy and International Management (SIM) is to provide students with the advanced knowledge of strategic management necessary for a successful career as respected and responsible leaders.

The SIM offers an integrative and interdisciplinary approach, because only an approach of this nature can convey the ability to cope with the complex management challenges of our time. This approach earned the SIM 1st place in the Financial Times Rankings 2011–2020.

Objectives

We seek to shape generalists with a focus on strategy and international management. The SIM programme is designed for a select group of international and domestic students. As the programme operates in an international setting, the course and assessment language is English. Graduates are awarded a Master of Arts HSG (M.A. HSG) in Strategy and International Management after three semesters of full-time studies (90 credits).

A unique international experience

The Strategy and International Management (SIM) programme attracts students with the ambition to succeed in the global marketplace. Beyond the classroom, the SIM emphasises international experiences and entrepreneurial challenges including a broad array of exchange programmes, as well as international projects and internships. Students are provided with unique opportunities for personal development. Additionally, the global SIM community enriches each student with a culturally diverse international network.

Sharpening capabilities

The SIM recognises the importance of well-rounded managers above and beyond management theory. Soft skills are integrated into the SIM programme in order to develop managers’ intellectual flexibility and intercultural qualifications. Hard skills are adapted and perfected through international work projects and exclusive training workshops. Additionally, our international faculty reflects the balance between academic rigour and managerial relevance that will empower SIM students throughout their future careers.

Student profile

Students applying for the SIM programme are skilled, self-aware individuals with a high level of intercultural understanding, both willing and able to embrace different perspectives. Their unique combination of meaningful life experiences, strong values, outstanding talent, and high ambitions puts them on track to become responsible global leaders.

Career opportunities

By fostering academic excellence, intercultural and language skills, as well as an interdisciplinary problem-solving approach, the SIM programme optimally equips students for top positions in key business arenas such as international management, business consulting or entrepreneurship. Most SIM students sign professional contracts before completing their studies. They receive challenging and attractive job offers from highly

respected companies in various business sectors throughout the world. Many SIM students also find encouragement and support to start their own business ventures during their studies.

Content and structure

The SIM curriculum combines the research-based academic rigour of a Master of Arts with the interactive nature and practice-oriented approach present in leading MBA programmes. Students are thus offered the best of two learning worlds.

Compulsory courses

The compulsory courses advance students’ knowledge of the functional areas of management. Students explore advanced theories and concepts, examine managerial practice, and engage in scientific discussion.

Core electives

The core electives consist of Advanced Management Courses and Integratives. The latter focus on subjects of wide-spread and current interest in the field of management. Multidisciplinary perspectives are needed to embrace these subjects and explore ways to cope successfully with the major management challenges of our time.

SIM in Practice

- The SIMagination Challenge requires students to embark on an international social initiative which aims to create enriching and meaningful learning experiences for them.
- SIM students initiate and complete an international internship, called SIM International Project (SIM-IP). The purpose of the SIM-IP is for students to engage in challenging and practice-oriented work that is outside the classroom, yet still topically relevant to their studies.

Studying internationally

Key partnerships with two prestigious MBA programmes offer SIM students the opportunity to gain a double degree with either INCAE Business School in Costa Rica or Nanyang Business School in Singapore. Within two years, students acquire both, the SIM-HSG Master’s degree, and a globally recognised MBA degree.

nanyangmba.ntu.edu.sg
incae.edu

In addition to these select MBA double degree opportunities within the SIM, the University offers opportunities for exchange semesters and double degrees. By spending an exchange semester at a CEMS partner university, students can obtain the CEMS MiM. SIM students also have the opportunity to apply for a double degree programme with ESADE in Barcelona, HEC in Paris, RSM Erasmus University in Rotterdam and FGV in São Paulo, or for an exchange programme with one of over 200 partner universities.

With its high-quality education and its prestigious alumni network, the Master’s programme in Banking and Finance (MBF) is one of the leading international finance programmes.

A top-tier international faculty in the fields of Financial Markets, Financial Institutions, Corporate Finance, Quantitative Methods and Insurance offers a challenging programme including both theory and application. In the global ranking of the Financial Times Finance Masters, the MBF programme has been ranked among the top finance programmes for eight consecutive years, and ranks number one in Switzerland and in German-speaking countries.

Objectives

Through an integrative approach of theory and application, the MBF programme aims to prepare the students for their ambitious professional careers in various industries. In addition to the three compulsory courses – Financial Markets, Financial Institutions and Quantitative Methods – the students have the possibility to choose from a broad range of elective courses, with subjects ranging from corporate finance and alternative investments to insurance management. The courses enable students to develop a strong analytical skill set and a deep understanding of financial concepts.

Furthermore, tailored events such as the MBF Integration Days, the MBF Research Retreat, the MBF Career Workshop Series and the Career Power Days, aim to foster the MBF community and offer great opportunities to develop effective practical skills.

Student profile

The MBF programme attracts ambitious, hard-working, and skilled students, interested in the fields of finance, business, and banking. Students typically have a strong academic background and are looking to deepen their technical skill set in finance, to be fully prepared for all future professional challenges. Indeed, they are usually highly interested in financial markets and financial institutions and eager to learn the quantitative methods related to them. Furthermore, prospective students should possess strong analytical skills and be keen to solve challenging tasks related to finance. Above all, we expect our students to be effective communicators who are able to thrive in an international environment.

Career opportunities

Upon graduation from the MBF, the students are fully prepared to pursue exciting positions in top-tier companies in Switzerland and around the world. From internships to full-time positions, the students are offered many attractive opportunities after their studies in areas such as banking, finance, and consulting. In particular, MBF students have the possibility to:

- take on jobs in financial institutions such as banks, insurance companies, and asset management firms;
- work for large multinational investment banks or small M&A boutiques and venture capital firms;
- work as auditors in the fields of banking and insurance;
- work in the finance or strategy departments of industrial corporations;
- pursue an academic career in finance, in the context of doctoral studies (Ph.D.);
- engage as (FinTech-) entrepreneurs;
- start a career in public financial institutions, such as central banks.

Companies are enthusiastic about welcoming MBF students and working together to face the challenges of the various industries. In terms of the number of hires, these are the top 10 employers of MBF graduates from 2017–2020: Bain & Company, Boston Consulting Group, McKinsey & Company, UBS, SIX Group, Credit Suisse, Deloitte, Perella Weinberg Partners, Roland Berger, Citi.

Industrial partners

The MBF corporate partners, including Credit Suisse, Boston Consulting Group, UBS, Fidelity International and Zürcher Kantonalbank are essential in the functioning of the programme. Indeed, the MBF partners contribute to the knowledge transfer from industry to academia through various guest lectures and events, offer a powerful network for the students, organize interesting company events, and collaborate on practically relevant master’s thesis topics.

Content and structure

The MBF programme has a clear and flexible course structure. The core studies are made up of three compulsory courses and a broad choice of electives.

Compulsory subjects

In the first semester, students attend the compulsory courses Financial Markets, Financial Institutions, and Quantitative Methods. These challenging courses allow the students to develop the fundamentals in finance, to further tackle the other specialised courses and the empirical Master’s thesis.

Core electives

Throughout the programme, students may design their individual curriculum according to their preferences. They can freely combine courses from an extensive list of core electives grouped in the focus areas of Financial Markets, Banking & the Financial Economy, Corporate Finance, Alternative Investments, Risk Management & Insurance and Quantitative Methods & Data Science. It is also possible to obtain a Diploma Supplement in one of the abovementioned areas, when a student completes at least 12 ECTS and the Master’s thesis in the corresponding subject track. The wide selection of courses and the flexibility of the curriculum make the MBF programme particularly attractive.

Research seminar

The research seminar is a 3 ECTS course, available in the spring semester, where the students are required to write a paper with a particular research focus. All groups present and discuss their main findings with the class. In combination with the master’s thesis, the MBF therefore provides a thorough preparation for a Ph.D.

Independent electives

Independent electives create additional choices, where students may either attend further core electives of the MBF or courses of other master’s programmes.

MBF admission criteria

- A university degree that is recognised as equivalent, in the same or a similar major, with at least 180 credits
- Applicants are admitted on the basis of the assessment of the following criteria:
  - GMAT* or GRE*
    (*non-mandatory for students with a Swiss Bachelor’s degree)
  - Average grade during undergraduate studies
  - Extracurricular activities, including practical experience and exchange semester
  - Motivation and aptitude for the programme as expressed in a binding letter of motivation
  - Proficiency in the English language
- The MBF Integration Days are compulsory.

The admission criteria may be subject to change. Please consult our website for the latest detailed admission criteria: admissions.unisg.ch

Programme language

The MBF is taught in English.
Facts & Figures

- Application time frame: 1 October – 30 April
- MBF Integration Days (calendar week 36)
- Programme start: Autumn Semester (calendar week 38)
- Duration: 3 semesters (90 ECTS credits)
- Language: English
- Intake, academic year 2020/2021: 143
- International MBF students: 45%
- Male/female: 72%/28%
- Employed three months after graduation: 100%
The Master’s programme in Economics (MEcon) offers a comprehensive education in economics. It provides in-depth theoretical and empirical knowledge in order to analyse the social and economic challenges of our time.

Due to the advance of digitalization, data analytics has become a central component of developed economies. Hence, over recent years processing and interpreting large data sets has become increasingly important. The Master’s programme in Economics (MEcon) provides you with the necessary tools to research economic policy problems using state-of-the-art methods and to develop strategies in order to solve these problems.

Objectives

With the MEcon you gain a clear understanding of key economic and social interdependencies, as well as the ability to analyse large amounts of data. The MEcon enables our students to develop skills in a number of important areas:

- During the MEcon, you will develop a clear understanding of the central economic and social interrelationships
- You deepen your knowledge in methods and theory for empirical economic research and can already apply this during your studies
- You will learn how to deal with large amounts of data. You will get to know different tools for data preparation and will be able to analyze and interpret the data from an economic point of view.
- You will learn to apply your knowledge of economics to solve real economic policy and social problems, such as incentive systems, corporate governance, globalization, aging society, unemployment, the welfare state, growth, etc.
- In addition, your management and communication skills will be trained.

Student Profile

The MEcon is suitable for you if you are interested in social and economic developments and problems. For this, you would like to acquire sound methodological skills in economic theory and empirical analysis. You already have basic economic knowledge, mathematical skills and you like to think analytically. You are interested in applying your newly acquired knowledge in order to solve real economic problems.

Career opportunities

The MEcon provides the knowledge and skills needed to understand and analyse economic processes and to develop solutions to economic problems. This expertise opens up varied career paths in a wide range of professional fields. MEcon graduates are in demand for positions of responsibility in the public sector, international organisations, consultancy firms, as well as in banks and insurance companies. If you are striving for an academic career, the academic education in MEcon also provides an excellent preparation for Ph.D. programmes.

Content and structure

The MEcon is a full-time programme with a course load of 90 credits and is designed for a standard study period of three semesters. The MEcon has a clear and flexible structure. The core studies are made up of seven compulsory courses and a wide choice of core electives and electives.

Total 18
Compulsory subjects

In the first two semesters, students attend the compulsory courses in which you deepen your knowledge in the core areas of economics and acquire advanced methodological skills. Based on these rigorous foundations, students subsequently choose their core electives and electives.

Core electives and electives

In the second and third semester, students may design their individual curriculum according to their preferences. The core electives include courses for advanced applications. From a wide range of courses, you choose according to your interests and strengths. With your choice of electives, you deepen your own study profile. MEcon offers the following specialisation areas:

- Global Economy
- Public Policy
- Managerial Economics
- Financial Economics
- Digitisation and Data Analytics

Practice credits

We encourage students to acquire practical experience before and during their Master’s studies and thus establish contacts with potential employers. Students can earn practice credits (up to 6 credits) for qualified internships that count towards their curricular course requirements.

Studying internationally

The University of St.Gallen is very well connected internationally. As a MEcon student, you have the opportunity to apply for the double degree programme with Stockholm School of Economics (SSE), allowing you to supplement your HSG Master’s degree with a second Master’s degree from SSE in the field of Economics within two years.

You can also apply for a double degree programme (DM2) at ESADE Barcelona, HEC Paris or RSM Rotterdam.

The CEMS Master’s in International Management is also open to you.

In addition, the HSG offers exchange programmes with over 200 partner universities worldwide.

MEcon admission criteria

- A university degree that is recognized as equivalent, in the same or a similar major, with at least 180 credits (at least 60 credits in Economics).
- International students are admitted on the strength of the documents they submit.
- Supplementary work (Integration Week Economics or Master’s preparatory courses) is compulsory.

The admission criteria may be subject to change. Please consult our website for the latest detailed admission criteria:

admissions.unisg.ch

Programme language

The MEcon can be studied in a mixture of German and English. All compulsory courses are held in English.
Facts & Figures

– Application time frame: 1 October – 31 March
– Integration Week Economics (calendar week 36)
– Programme start: Autumn Semester (calendar week 38)
– Duration: 3 semesters (90 ECTS credits)
– Language: English and German
– Intake, academic year 2020/2021: 31

– Signed a job contract by the time of graduation: 81 %

* Average of all Master’s programmes 2020
The Master’s programme in Quantitative Economics and Finance (MiQE/F) offers a high-quality education in economics, econometrics and quantitative methods, with a strong focus on finance.

Objectives

As a MiQE/F student, you develop a deep understanding of economic and financial theories. Given the challenges and increasing importance of digitalization, MiQE/F offers courses on big data, machine learning and related topics for successful careers in the digital age.

– You develop a deep understanding of economics and finance theories.
– You gain strong methodological competences with distinctive skills in econometrics, quantitative methods and machine learning.
– MiQE/F prepares you for economics in the “digital age”. You will be able to handle, analyse and interpret large data sets with different tools and programmes.
– You know how to apply your diverse skill set to analyse data and solve complex and challenging real-world problems.
– In addition, your management and communication skills are trained.

Student profile

MiQE/F students are characterised by a great interest in practical problems and academic questions. The programme is aimed at students with a sound education in economics, strong quantitative and analytical skills and the ability to master abstract concepts. You are interested in analysing complex problems in the areas of economics and finance, in particular through the application of quantitative methods. If you like to study in an international environment and strive for academic excellence, then the MiQE/F is the right choice for you.

Career opportunities

Graduates of pure business and economics programmes often lack in-depth training in quantitative methods. Mathematicians and statisticians often lack an economics or finance background. As a MiQE/F graduate you bridge the gap with your diverse skill set. Policy and financial institutions and firms in the private sector are increasingly confronted with complex problems requiring a confident application of methods as well as a deep understanding of economic processes and the financial sector. MiQE/F graduates are well prepared for responsible positions in the areas of banking and finance, consulting and insurance. Due to its strong methodological training, MiQE/F graduates are also extremely well equipped to pursue an academic career.

Cooperation with LGT

The LGT Group is an official partner of the MiQE/F programme. Each year, LGT awards a prize of CHF 5,000 for the best MiQE/F degree. Moreover, the LGT Group offers internships for our MiQE/F students to gain practical knowledge and earn practice credits.

Content and structure

The MiQE/F programme is a full-time programme with a course load of 90 credits and is designed for a standard study period of three semesters. The MiQE/F programme has a clear and flexible structure. The core studies are made up of eight compulsory courses and a wide choice of core electives and electives.

Compulsory subjects

In the first two semesters, students attend the compulsory courses which focus on finance, economics, econometrics and quantitative methods. Based on these rigorous foundations, students subsequently choose their core and independent electives.

Core electives and electives

In the second and third semester, students may design their individual curriculum according to their preferences. The core electives involve advanced application-oriented and problem-solving courses. From a wide range of core courses, you choose your courses according to your interests and strengths. With your choice of core electives, you develop your own study profile. Electives create additional choices: students may either attend further core electives of the MiQE/F or courses of other Master’s programmes.

The wide selection of courses and the flexibility of the curriculum make the MiQE/F programme particularly attractive.

Practice Credits

We encourage students to acquire practical experience before and during their Master’s studies and thus establish contacts with potential employers. Students can earn practice credits (up to 6 credits) for qualified internships that count towards their curricular course requirements.

Studying internationally

The University of St.Gallen is very well connected internationally. As a MiQE/F student, you have the opportunity to apply for the double degree programme with Stockholm School of Economics (SSE), allowing you to supplement your HSG Master’s degree with a second Master’s degree from SSE in the field of Economics within two years.

You can also apply for a double degree programme (DM2) at ESADE Barcelona, HEC Paris, RSM Rotterdam or Bocconi University in Milan.

The CEMS Master’s in International Management is also open to you.

In addition, the HSG offers exchange programmes with over 200 partner universities worldwide.

MiQE/F admission criteria

– A university degree that is recognised as equivalent, in the same or a similar major, with at least 180 credits (at least 60 credits in Economics).
– Applicants are admitted on the basis of the assessment of the following criteria:
  – GRE/GMAT
  – Grade average
  – Writing Sample (usually Bachelor’s thesis)
  – Extracurricular activities and letter of motivation
  – Proficiency in the English language
  – Supplementary work (Integration Week Economics or Master’s preparatory courses) is compulsory.

The admission criteria may be subject to change. Please consult our website for the latest detailed admission criteria:
admissions.unisg.ch

* Average of all Master’s programmes 2020
The Master’s programme in International Affairs and Governance (MIA) is designed for students who seek to contribute to effective and sustainable solutions for today’s transnational challenges.

MIA graduates are trained as flexible generalists and know how to integrate the specialist knowledge required to address today’s pressing political, economic and social problems. Combining interdisciplinary study with a results-oriented approach, the MIA programme prepares graduates for a world in which leaders and professionals must increasingly be able to work across borders, disciplines and sectors.

Objectives

Many of today’s most pressing issues are to be found at the crossroads of politics, the economy and law. Understanding them requires more than one single academic discipline. In addition, mastering these challenges demands an international perspective and cross-border cooperation.

Our students (1) acquire thorough, integrated knowledge and understanding of advanced core areas in business administration, economics, law, and political science. They (2) develop a strong working knowledge and the skills to identify and apply adequate methods in tackling academic or policy problems in International Affairs. They further (3) know how to contextualise and systematically analyse information in order to make sound decisions. And, (4) they can convincingly and credibly communicate their competencies, insights and expertise with relevant stakeholders.

Student profile

The MIA is aimed at ambitious and entrepreneurial students who are interested not only in a rigorous, research-based university education in International Affairs, but also in the world of practice. MIA students assume responsibility and are willing to actively contribute to society, the economy and politics.

Career opportunities

The MIA programme opens the door to a great variety of careers. Our graduates take on leadership positions in national and international organisations and NGOs, in business and management (e.g., consulting firms and multinational corporations), as well as in academia and think tanks. Moreover, the MIA prepares students for a Ph.D. programme, including the Programme in International Affairs and Political Economy (DIA) at HSG.

Content and structure

The rigorous interdisciplinary MIA curriculum integrates the diverse perspectives constitutive of Economics, Political Science, Business Administration, and Law. Core studies provide the foundations, research methods, and knowledge indispensable for a thorough understanding of the complexity of international problems.

- ‘Consultancy Projects’ (examples):
  - Digital Government
  - UN Security Council Reform

- Thematic and Methodological Courses (examples):
  - Security and Conflict:
    - The Second Nuclear Age
    - International Dispute Settlement
  - Democracy and Governance:
    - Current Regimes in World Politics
    - International Corporate Governance
  - Business and Public Policy:
    - Politics of Financial Regulation
    - Business in Europe
  - Sustainability and Development:
    - Multilevel Energy and Climate Governance
    - Fighting Global Poverty

- Data Analytics & Methods:
  - Experimental Methods and Causal Inference
  - Comparative Case Studies

- MIA Mornings: Competences & Skills (examples):
  - Agile Project Management
  - Infographics
  - Legal Reasoning

- Professional Course:
  - Cases in International Affairs
A selection of core electives allows students to choose and refine their areas of specialisation, developing a professionally relevant profile of their own. Possible areas of specialisation are (1) Security and Conflict, (2) Democracy and Governance, (3) Business and Public Policy or (4) Sustainability and Development. In addition, we offer specialised methodological courses. The MIA encourages the application of theoretical knowledge through practical 'Consultancy Projects', offering students the possibility of working on real-life problems together with practitioners. Students may also earn credits through internships. We further focus on the professional development of our students by training a wide range of transferable skills in dedicated workshops. In their Master’s thesis students concentrate on a research question of their own choice.

**Studying internationally**

The four double degree programmes with Sciences Po in Paris, The Fletcher School of Law and Diplomacy of Tufts University in Boston, Yonsei Graduate School of International Studies in Seoul and Universidad de los Andes in Bogotá provide selected students with the opportunity to obtain Master’s degrees from two renowned institutions within two academic years. MIA students can also apply for the one-year CEMS Master’s in International Management.

The University of St.Gallen is a member of the Association of Professional Schools of International Affairs (APSIA), which unites 39 leading schools in the United States, Europe and Asia. In addition, the University entertains a vast network of exchange agreements with approx. 200 partner universities worldwide.

**MIA admission criteria**

- A university degree that is recognised as equivalent, in Economics, Management, Social Sciences or Legal Studies, with at least 180 credits (at least 30 credits in Economics, Management, Legal Studies, Political Science, Public Administration or in International Relations).

- Applicants are admitted on the basis of the assessment of the following criteria:
  - Grade average
  - GMAT or GRE
  - Proof of work experience and extracurricular activities as well as intercultural mobility
  - Writing sample (e.g. Bachelor’s thesis)
  - Proficiency in the English language
  - Letter of motivation
  - Curriculum Vitae
- The MIA Fundamentals Week is compulsory.

The admission criteria may be subject to change. Please consult our website for the latest detailed admission criteria:

[admissions.unisg.ch](http://admissions.unisg.ch)

*Average of all Master’s programmes 2020
The shifting balance between the state and the economy has given rise to new challenges at the intersections of law, business and government. Addressing these issues calls for professionals who have the necessary legal skills and management capacities.

The Master’s programme in International Law (MIL) combines a specialist legal education with essential aspects of business and politics. We prepare our graduates for a wide range of careers in the corporate world, in government, diplomacy, and other public and private sector institutions.

Objectives

The Master’s programme in International Law (MIL) is designed to educate professionals with a clear focus on international law, business and government. As it prepares students for a career in an international setting, the teaching and assessment language is English. After three terms of full-time study, graduates are awarded a Master of Arts (M.A. HSG) in International Law. Through courses, research and practical engagement, students acquire a deep understanding of international law and its subfields, as well as a firm grasp of the complex interdependencies between law, the economy and the state. Blending a specialised legal education with elements of management studies and political science, the MIL equips students with the awareness and flexibility of thought to deal with interdisciplinary issues that call for innovative approaches and pose some of the most exciting intellectual and practical challenges in today’s world.

Student profile

With its interdisciplinary perspective, the MIL seeks to attract candidates from a variety of educational backgrounds. Some MIL students will have acquired their first degree in law or law and economics, others in fields such as international affairs, management and economics. This will allow graduates to benefit from the interactions within a diverse class of academic peers.

Career opportunities

The MIL curriculum combines a specialised legal education with interdisciplinary training, an international perspective and an emphasis on practical problem-solving. With its innovative curriculum, the MIL opens the door to a wide array of attractive positions, preparing graduates for professional careers in multinational corporations, government, diplomacy, international organisations, compliance and regulatory affairs, business consulting, law firms, NGOs, as well as other public and private institutions. Given its strategic focus on international law and the interdependencies with global business and government, the MIL differs from standard legal programmes that focus on domestic law and are intended for students who, after their bar exams, will go on to work as legal practitioners, particularly as attorneys or law clerks, in their national jurisdictions. Subject to the grades achieved, the MIL degree will also enable students to start a promising academic career as it provides access to Ph.D. programmes.

Content and structure

The MIL offers students enormous latitude and flexibility in choosing courses from the programme’s rich and diverse curriculum. This enables students to put together a degree course that meets their professional objectives and personal preferences. A distinctive feature of the MIL curriculum is the carefully arranged combination of compulsory courses and electives. Three compulsory courses ensure that students will acquire a sound general understanding of the normative and analytical framework of international law.

Compulsory subjects

The three compulsory courses are foundational in character. They provide students with the knowledge, the analytical tools and the practical skills required for a general grasp of the theory and practice of international law. The compulsory courses are the basis upon which students can build when they attend more specialised legal classes in subsequent semesters.

– Foundations of International and European Business and Economic Law
– The International Legal Order
– Global Governance

Core electives

Core electives are courses designed to deepen students’ understanding of specific international law topics. Courses are organised in clusters, each concentrating on a particular subject area. Some courses seek to familiarise participants with the practical approaches to problem-solving at the intersections of law, business and politics.

Legal electives

Legal electives enhance students’ legal expertise and allow them to specialise while granting them great freedom of choice. Students may attend various courses from the MLaw and MLE. In addition, they are invited to participate in a variety of practice workshops, especially Moots, in which the Law School regularly takes part.

Independent electives

Independent electives create additional choices: students may either attend further core electives of the MIL or courses of other Master’s programmes.

Studying internationally

– CEMS MIM
– Exchange programmes with approx. 200 partner universities worldwide
– Double degree programme with The Fletcher School of Law and Diplomacy
– Partner in the THEMIS Law Network

MIL admission criteria

– A university degree that is recognised as equivalent, in the same or a similar major, with at least 180 credits (at least 30 credits in legal studies).
– International students are admitted on the strength of the documents they submit.
– Supplementary work may be required.

The admission criteria may be subject to change. Please consult our website for the latest detailed admission criteria:

Programme language

The MIL is taught in English.
Facts & Figures

– Application time frame: 1 September – 30 November / 1 February – 30 April
– Programme start: Spring Semester (calendar week 8) / Autumn Semester (calendar week 38)
– Duration: 3 semesters (90 ECTS credits)
– Language: English
– Intake, academic year 2020/2021: 75
– International MIL students: 32 %
– Male/female: 39 %/61 %
– Job offers before graduation: 1.9*
– Signed a job contract by the time of graduation: 91 %

*Average of all Master’s programmes 2020
We offer you an innovative programme to achieve your M.Sc. in Computer Science, either with a specialisation in Data Science or in Software and Systems Engineering. Our modern curriculum, which combines Computer Science with relevant skills in management and entrepreneurship, will prepare you for a career as a Computer Science entrepreneur or for an executive position in a technology company. Benefit from close mentoring by our faculty, our unique campus culture, the clubs and associations of HSG’s Student Union, and the many opportunities that St.Gallen offers. This degree course has been set up as part of the IT Education Initiative of the Canton of St.Gallen.

Objectives

The Master’s programme in Computer Science will equip you with solid competencies – in both theory and application. The specialisations of our programme in Data Science and Software and Systems Engineering will be complemented by master foundation courses such as Cybersecurity and Human-Computer Interaction. Together, these courses will equip you to:

- extract knowledge from data and use it to understand markets, products, and people.
- gain expertise in Natural Language Processing and its application, such as chatbots, voice assistance, competitive analysis, market research, and social media analysis.
- learn how to build self-learning systems to change the world with artificial intelligence.
- create autonomous, adaptive, and interactive systems that can cope with real-world complexity at planet-scale.

Tailored courses on entrepreneurship topics will help you to develop a personality and a skill set not only as a computer scientist, but also as a leader or entrepreneur in a world that is driven by Computer Science and Information Technology, or as an integral part of innovative companies on local and international scale. You will learn to innovate, design, and implement cutting-edge technology and use it to create proofs of concept, prototypes, and products that will succeed on the market! You will benefit from small student groups, close interaction with the Computer Science faculty, and plenty of possibilities for being part of the university’s research projects in Computer Science and in multidisciplinary settings. A wide range of events offers you the great opportunity to expand your personal network with the various student communities at HSG.

Student profile

The Master’s programme in Computer Science is intended for students with an academic background (undergraduate or early graduate) in Computer Science or in a related subject. The programme is aimed at students who are interested in specialising in one of our core areas. We furthermore welcome applications from students with an undergraduate degree in related subjects (e.g., Business Informatics or Electrical Engineering) who will have the opportunity to demonstrate their strong knowledge of Computer Science during the admission process. The integration of entrepreneurship topics into the curriculum is an important part of our concept. That is why we expect our students to work diligently on these topics as well as to develop the related skills.

Integrative Master Project (3rd semester)  
Master’s Thesis (4th semester)
The Computer Science programme in St. Gallen is brand new – be a pioneer and enjoy being part of a developing story!

Career opportunities

Computer Science and Information Technology are ubiquitous in today’s world. The perspectives for graduates are wide-ranging. With an HSG degree in Computer Science you will be well equipped to:

– become a technology entrepreneur or an executive in an information technology-related function.
– shape companies on local and global scales from within, as an expert and key member of innovation teams.
– develop software products that meet the needs of your customers.
– work on interesting and relevant innovation projects in a consulting firm.
– pursue an academic career researching topics of the future.

Content and structure

The Master’s programme in Computer Science is designed to be completed in four semesters (120 ECTS). You will attend compulsory courses in Computer Science, select among the specialisations, and enrich your curriculum with management and entrepreneurship courses, and electives from contextual studies.

Compulsory courses

You will attend four compulsory courses in Advanced Software and Systems Engineering, Cybersecurity, Data Science, and Human-Computer Interaction, which together form the basis of the programme.

Specialisations

You will select one of the specialisations, either Data Science or Software and Systems Engineering. Across the specialisations, we offer a variety of courses on advanced Computer Science topics such as Data Analysis, Machine Learning, Deep Learning, Natural Language Processing, Agile Software Development, and Autonomous, Adaptive, and Interactive Systems. Among these, you may choose those courses that suit your interests best and are free to mix in one or two courses from the complementary specialisation.

Management and Entrepreneurship

You will select courses in management and entrepreneurship from the portfolio of tailored courses for HSG Computer Science students. Here, you will find courses on topics such as leadership, entrepreneurship, finance, marketing, and strategy.

Integrative Master’s project and Master’s Thesis

The integrative project will enable you to combine your Computer Science skills with the insights you gained from your management and entrepreneurship courses. You will apply what you learned in a real-world use case, often in close collaboration with industry. The Master’s thesis will enable you to concentrate on a research question in a specialised subject area. You will be supervised by a faculty member and closely connected to her or his research team. An excellent Master’s thesis will open you the opportunity to pursue an academic career.

Contextual Studies

As a unique and valuable element of each Master’s programme in St. Gallen, the contextual studies offer a wide range of topics covering social, economic, and legal aspects of technology. The integrative portfolio seminar enables you to apply your knowledge from the Computer Science courses in an interdisciplinary context.

MCS admission criteria

– An academic degree in Computer Science or equivalent, with at least 180 credits.
– Applicants with an academic degree from another discipline, which is only partly recognised as equivalent or
– from the University of St. Gallen, but not in Computer Science, will have to pass an admission test and provide evidence of adequate knowledge of Computer Science.
– International students are admitted on the strength of the documents they submit.

Please consult our website for further details and the most up-to-date information about the admission criteria: admissions.unisg.ch

Programme language

The MCS is taught in English.

Facts & Figures

– Programme start: Autumn semester (calendar week 38)
– Duration: 4 semesters (120 ECTS credits)
– Language: English
Certificate in Data Science Fundamentals (DSF)

Today’s world is full of data – data on the success of corporate strategies, the behaviour of customers, investors and the electorate: digitalisation enables us to measure almost everything and to store vast quantities of data (“big data”), which are then available to decision-makers. The scientific approach to deducing decisions from data is called data science. Since this development is still young, many organisations lack the relevant scientists, particularly employees who have a degree in economics, international affairs or law while being familiar with data science at the same time. The Certificate in Data Science Fundamentals (DSF) provides you with an opportunity to acquire a fundamental knowledge of data science. Our modus operandi is very much practice-oriented, with programming playing a central role; yet no prior knowledge is required: curiosity and motivation are what count most. We regard programming as a means to an end, enabling us to solve exciting practical problems with the help of data. The programme extends to 24 credits; 16 credits can be credited to the degree course. It is open to Bachelor’s students of all majors and starts every Autumn Semester.

Programme language
The Certificate in Data Science Fundamentals is taught in English.

This additional qualification programme is offered at the Bachelor’s level.

“Without any prior experience of data science and programming I felt like falling into digital Narnia, but after a short time I was able to experience the steepest learning curve I’ve ever had in my life.”

Aurelia Raeber, Switzerland
Certificate in Data Science Fundamentals
Certificate in Managing Climate Solutions (MaCS)

“I believe that the Managing Climate Solutions certificate will provide me with an opening to new horizons in the field of climate change, and with the tools for a global understanding of one of society’s biggest challenges.”

Elsa Devaux, Switzerland
Certificate in Managing Climate Solutions

The certificate programme MaCS-HSG addresses one of the biggest societal challenges of our time. Climate change is now widely acknowledged, but how can it be successfully tackled? This is the key question to be answered by future leaders in business and society. Through the additional qualification in Managing Climate Solutions, students will complement their core Master’s programme at the University of St.Gallen with dedicated courses enabling them to understand the magnitude of the challenge, to explore the range of possible solutions, to craft behaviourally informed strategies, and to shape a positive future in a carbon-constrained world.

The programme consists of (a) an introductory course “Climate Solutions 101” in the fall semester (5 ECTS), combining a physical kick-off week with blended learning elements and a compact course in the second week of the semester break, (b) a set of elective courses from various Master’s programmes at the University of St.Gallen (16 ECTS), and (c) a mandatory course “Multidisciplinary Perspectives on Climate Solutions” in the spring semester (3 ECTS), where the students will implement a specific climate solution. The design of the programme allows electives to be partially recognised for the student’s main Master’s degree.

Programme language

The Certificate in Managing Climate Solutions is taught in English.

This additional qualification programme is offered at the Master’s level.

The HSG Asia Term is the flagship exchange programme for undergraduates of the majors in economics and law who have a strong interest in the Asia pacific region. During their stay in Singapore, students attend lectures at the Singapore Management University (SMU) and work in business consulting projects with local and multinational companies.

In return, students from SMU spend an exchange semester at HSG and attend courses on the topic of Management in Europe.

asiaterm.unisg.ch
singapore.unisg.ch

The HSG Latam Term is the newest international opportunity for Bachelor’s students in the majors in economics and law aiming to gain experience and knowledge in Latin America. Students attend courses at Fundação Getúlio Vargas (FGV) and participate in consulting projects with local and international companies and start-ups. The international experience begins already the previous semester with FGV students spending an exchange term at the HSG within the St.Gallen Connection programme.

latamterm.unisg.ch

The HSG Asia Term and HSG Latam Term programmes are offered at the Bachelor’s level.
CEMS – The Global Alliance in Management Education – and your passport to a global community. As many as 34 world-class academic institutions collaborate with more than 70 corporate partners and 7 NGOs. The University of St.Gallen has been a member of CEMS since 1989, thus enabling its students to complete the Master’s in International Management (CEMS MIM) in parallel to their HSG Master’s programme. Consistently ranked among the best in the world by the Financial Times, CEMS is the ultimate academic-corporate bridge programme. The CEMS academic and corporate members work collectively to develop knowledge and provide education that is essential in the multilingual, multicultural, and interconnected business world.

The MIM Curriculum

During the one-year CEMS MIM curriculum students will learn to leverage cultural diversity with a deep level of understanding to make informed decisions. They will be challenged to develop their reflective critical thinking skills, enabling them to apply innovative solutions to complex business cases. Active engagement with the corporate world, through seminars, business projects, networking events, and an international internship, facilitates entry into leadership roles early on in their career.

Student profile

The CEMS programme is suitable for students who want to improve their academic standards, their achievement potential, and their cultural competencies. In addition, they should want to take responsibility within society and prepare themselves for global leadership roles. There are many reasons to join the CEMS programme. One of the main advantages is the lifelong network, which will help students to cultivate and maintain long-lasting friendly and professional contacts among all the stakeholders of the alliance worldwide.

Admission

The CEMS MIM is a double degree programme and students must be enrolled in one of our regular Master’s programmes in order to apply.

cems@unisg.ch
cems.unisg.ch
Double degree programmes

DM2

Five top European business schools participate in the DM2 double degree programme:

– Università Bocconi, Milan, Italy
– ESADE, Barcelona, Spain
– HEC Paris, France
– Rotterdam School of Management, Erasmus University, Netherlands
– University of St.Gallen (HSG), Switzerland

With more than 30 different programmes available from all universities, the DM2 offers HSG students in business and economics Master’s programmes a wide variety of combinations for more extensive studies in the same or a different field of study. After 2–2.5 years of successful studies, students obtain two full Master’s degrees from leading European universities. DM2 graduates also enjoy the very best career opportunities and close links with both universities and their alumni organisations.

unisg.link/doubledegrees

Double degree at FGV-EAESP, São Paulo

The double degree programme with FGV-EAESP (Fundação Getulio Vargas, Escola de Administração de Empresas de São Paulo) offers students in the Master’s in Strategy and International Management (SIM) and the Master’s in Banking and Finance (MBF) the opportunity to earn a second degree from one of the most renowned schools of business in Latin America.
unisg.link/doubledegrees

Double degree at SSE Stockholm

The Master’s in Economics (MEcon) and the Master’s in Quantitative Economics and Finance (MiQE/F) offer double degree programmes in Economics at SSE in Stockholm. The Master’s in Banking and Finance (MBF) offers an opportunity for a double degree in Finance at SSE.
unisg.link/doubledegrees

MIA double degree

As a member of the Association of Professional Schools of International Affairs (APSIA), the University of St.Gallen offers students of the Master’s in International Affairs and Governance (MIA) double degree programmes with the following universities:

– Institut d’Etudes Politiques (Sciences Po) in Paris, France
– The Fletcher School of Law and Diplomacy of Tufts University in Medford, Boston, USA
– Graduate School of International Studies of Yonsei University in Seoul, South Korea

In addition, MIA students may apply for the double degree programme with:

– Universidad de los Andes, Bogotá, Colombia

In each case, MIA students spend one year at our partner university and one year at the University of St.Gallen. The close cooperation between the two institutions and the mutual recognition of course work ensure that students receive a high-quality education with a genuine cross-border reach. After two years students will have obtained a Master’s degree from each of the two institutions.
mia.unisg.ch
apsia.org
SIM double degree

Our Master’s in Strategy and International Management (SIM) offers double degrees with Nanyang Business School (NBS) in Singapore and with INCAE Business School in Costa Rica. Students earn a Master’s degree from the HSG and an MBA degree from NBS or INCAE.

mil.unisg.ch

Law double degree

Students of the Law Master’s programmes can apply for a double degree programme with The Fletcher School of Law and Diplomacy in the USA.

mil.unisg.ch

THEMIS certificate programme

To obtain the International THEMIS certificate HSG graduate level law students will spend one semester abroad, take part in the THEMIS seminar and complete an internship. The following twelve universities build the THEMIS network: Università Bocconi, Milan; ESADE Law School, Barcelona; Freie Universität Berlin; Université Paris-Est Créteil Val de Marne; Maastricht University; Singapore Management University; University of St.Gallen (HSG); Vienna University of Economics and Business; Universidad Nova de Lisboa; Taiwan National University; Victoria University Wellington; City University of Hong Kong.

Career & Corporate Services

Degree courses overview
The Career & Corporate Services of the University of St.Gallen is the central contact point for our students regarding their entry into professional life. The certified coaches of the CSC team have extensive know-how of various industries and fields. Their aim is to support our students in their career planning and in the realisation of their career steps according to individual requirements. For this purpose, the CSC offers individual consultations and workshops about various topics, such as the professional drafting of application documents, (video) interview training and personal career exploration and decision-making. The CSC also supports international students in their entry into professional life in the Swiss labour market and provides them with information about features of Swiss labour law and culture.

The career and event platform provides our students with a job database offering internships, traineeships and regular jobs. In addition, they can fill in their profiles on the platform and thus directly can be found by potential employers or register for events. Besides the various workshops, this also includes the HSG TALENTS Conference (hsgtalents.ch), the HSG Banking Days (hsgbankingdays.ch), as well as HSG Career Days (hsgcareerdays.ch), focusing on FMCG, Industry, Legal, Luxury and Tech.

The HSG TALENTS Conference is the HSG’s official recruiting event. It provides our students with an opportunity to establish contact with more than 100 national and international companies, which present themselves at the Company Insight event, offer workshops and conduct interviews or get to know students better in new formats such as Mix, Shake & Associate. The companies also participate in the main event of this conference: the fair in the Olma Halls. Corporate representatives provide an insight into their work and answer questions about their industries and their companies. These events are the perfect opportunity to get to know various companies. hsgtalents.ch

The labour market puts a premium on HSG degrees. On average, graduates are able to choose between two job offers.

Search for employment: over 80% of graduates already have a job at the time of graduation.
HSG Alumni is the official organisation of former students of the University of St.Gallen. With 31,000 members and 180 Alumni Clubs on five continents, it is one of Europe’s leading associations of this type. It reinforces the alumni’s lifelong bonds with the University, as well as the networks among its members, by means of numerous events and information platforms.

hsgalumni.ch
When I first landed at Zurich airport, I saw a slogan on a Swiss International Air Lines poster, with which I cannot agree more: “Switzerland is not a small country, it is the heart of Europe.” The last three years, which I spent in the leading business school in “the heart of Europe”, are not only a beautiful memory for life, but also a prologue to my success story.

Unlike an ordinary business school, the University of St.Gallen places extra emphasis on its students’ theoretical knowledge and research ability. Before coming to the HSG, I graduated from Shanghai International Studies University, a liberal arts college focusing on literature, politics and diplomacy. During my undergraduate studies, I mainly took courses in business administration and literature without too much training in quantitative subjects. Thanks to our theoretical emphasis and academic strength, I was able to develop my quantitative skillset. Besides its rigorous academic standard, the HSG also encouraged me to extend my explorations beyond the textbooks and accumulate practical experiences.

Thanks to the strong reputation, I had the valuable opportunity to observe the internationalisation of the Renminbi (RMB) in the China Construction Bank Zurich branch, the only RMB clearing institution in the Swiss market.

With all the valuable experience and knowledge accumulated during my studies at the HSG, I was recently admitted to the fintech division of Meituan-Dianping, the third largest listed Chinese internet company. As the Chinese proverb says: “A drop of water in need shall be returned with a spring in deed.” The HSG has provided me with a wonderful start to my future career and life. Gratefully, I hope I will be able to contribute to the success story of the University of St.Gallen in return.

“Thanks to the career seminars and recruiting events organized by the CSC, I was able to quickly adapt to the Swiss workplace culture and build up my European industry network.”
